

2Rivers NV is hiring a full-time Software Engineer

2Rivers NV is a **young** and rapidly growing company created as a spin-off of Arts Centre Vooruit and Inceptive. We are the creators of the '**state-of-the-art**' **event planning software** Yesplan and combine expertise in the cultural sector with extensive **technical knowhow**.

Our event-planning software **Yesplan** is made for and by event organizers. Its highly visual and **intuitive user interface** makes it a web application that people really want to use. In addition, the software completely adapts itself very **flexibly** to the specific operation of each organisation. An **open API** allows the planning tool to integrate seamlessly with other software.

Profile

Miscellaneous

- Interest and a sense of responsibility to produce top quality work.
- Eager to continuously keep up with the latest technologies.
- Willing to participate actively in all software development tasks of a young startup company (from analysis, design and implementation to testing, deployment and support).
- Willingness to participate in the creative design of the product.
- Good communication skills.

Technical

- Excellent knowledge of object-oriented software development (Smalltalk, Java, Ruby, Objective-C, C#,...).
- Excellent knowledge of web development technology (Javascript, HTML, Ajax,...).

Degrees

- Master in computer science.
- Bachelor with development experience.

Assets

- Development experience in an object-oriented programming language.
- Knowledge of Smalltalk.
- Focus on usability and ease of use.

We offer

- The opportunity to enter a growing company in its early stages.
- The ability to participate in the creation of innovative software.
- A loose and open working environment with room for initiative and responsibility.
- A full-time permanent contract with a 6 months trial period.
